

Are you still using older and unsafe versions of internet browsers to access iBanking?

Cyber security is of prime importance for Standard Chartered. We urge you to kindly update your browser and use the latest version of internet browsers. Customers using older browser and unsafe versions will face issues interacting with application sites. From June 14, 2020 access to iBanking will be limited to newer, latest version of internet browsers only.

If you face any issue accessing iBanking from your internet browser, please update your browser to get access without intervention.
