**Risk Disclosure Statement:**

- Investment involves risks. The prices of units/shares of unit trusts or mutual funds fluctuate, sometimes dramatically and may become valueless. Investors may not get back the amount they have invested. It is as likely that losses will be incurred rather than profit made as a result of buying and selling unit trusts or mutual funds. Past performance is no guide to its future performance.
- Investors should read the terms and conditions contained in the relevant offering documents and in particular the investment policies and the risk factors and latest financial results information carefully and are advised to seek independent professional advice before making any investment decision. Investors should ensure they fully understand the risks associated with unit trusts or mutual funds and should also consider their own investment objective and risk tolerance level.
