

# Implementation of One Time Password (OTP) for Debit Card Online Purchases

For a more secured online purchase experience with debit card, we will be implementing a One Time Password (OTP) effective **6 August 2015**. OTP is a unique password that is sent via short messaging service (SMS) to the cardholder's mobile number registered with the Bank prior to completing an online purchase.

Please ensure you have registered your latest mobile number with us. For further queries, kindly call 03-77118888.

Thank you for banking with us.
